About Royal Facade

Royal Facade – is one of the leading manufacturers of Thin Brick Thermal Panels, serving customers across the United States and worldwide. We combine advanced technology, exceptional quality, and modern design to create durable and visually stunning facade solutions.

Our Advantages:

- **Uncompromising Quality** – we use only certified materials that meet international standards.
- **Global Presence** – we deliver products and provide services to clients in multiple countries worldwide.
- **Competitive Terms** – we offer attractive pricing and promotional offers.
- **Comprehensive Approach** – free consultations, on-site measurements, 3D visualizations, and installation support.
- **Customized Solutions** – we help you choose the best option tailored to your specific needs.
- **Guaranteed Durability** – we provide full technical documentation and back our products with a quality guarantee.

Royal Facade – World-Class Facades!

Our Values

We create Thin Brick Thermal Panels for exterior decoration and energy-efficient insulation — it's not just business, it's our passion. We know how to make your home warm, stylish, and long-lasting, and we put the very best the industry has to offer into every product.

- **Quality Without Compromise** – we offer only products we would confidently use in our own homes and recommend to our closest friends and family.
- **Exclusivity in Every Detail** – we don't produce mass-market panels; each one is crafted with the client's preferences in mind, highlighting the uniqueness of every property.
- **Craftsmanship and Expertise** – we master our craft, continually improving our technology and pushing innovation forward.
- **Competition as a Catalyst** – we analyze both the best and worst market examples to continually raise our standards.
- **Building a Sustainable Future** – by applying energy-efficient technologies, we enhance comfort while caring for the environment and encouraging responsible resource use.

We believe in the informed choices of our clients and proudly reflect that commitment in every Royal Facade thermal panel.

Manufacturing

- **Thin Brick Thermal Panel**

A Thin Brick Thermal Panel by Royal Facade is a solid, monolithic construction consisting of a self-extinguishing insulation board (expanded or extruded polystyrene, EPS or XPS) in your choice of thickness from 30 mm to 250 mm (1.18" to 9.84"), combined with ceramic tile, porcelain stoneware, or thin brick veneer. We hold an official adhesion strength test certificate in accordance with EAD 040914-00-0404.

- **Manufacturing Technology**

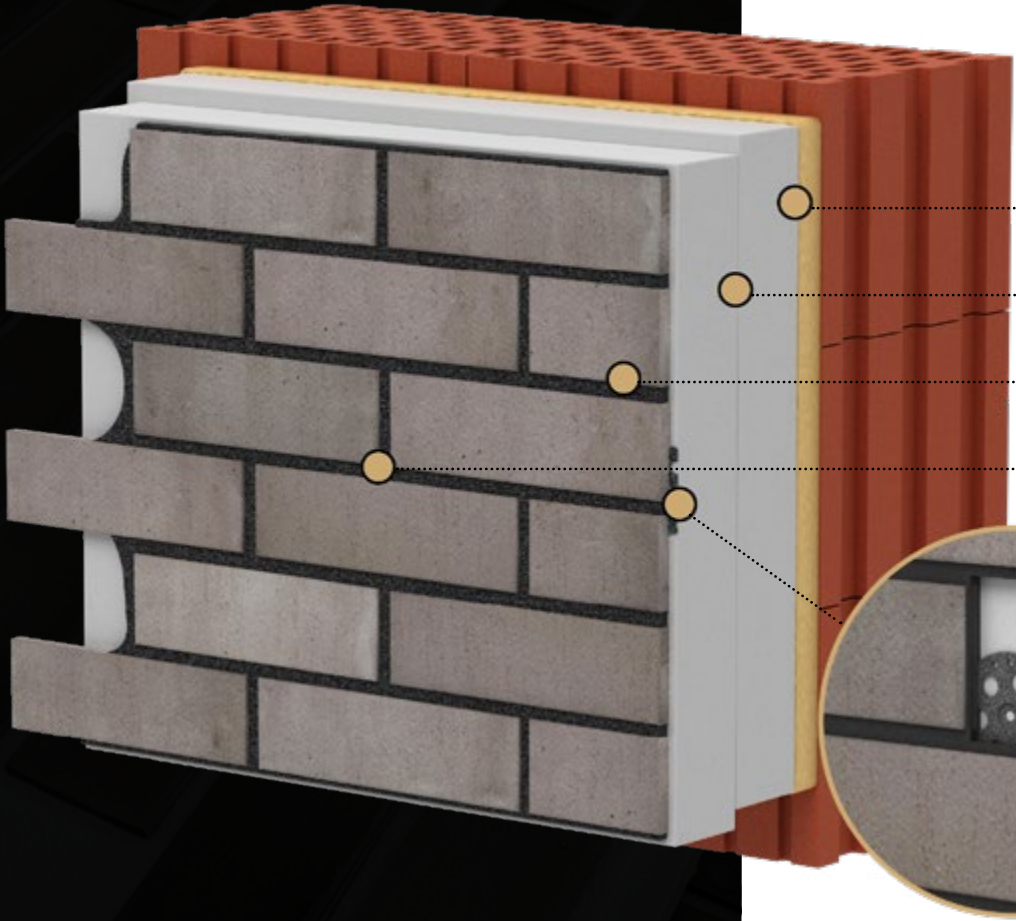

The bonding process between the two materials is carried out by pressing the tile into the insulation board using a one-component polyurethane adhesive. This adhesive penetrates deep into the structure of both materials across their full thickness, creating a solid, durable construction: decorative thin brick veneer + insulation = thermal panel. No standard adhesive mix can achieve such a strong bond between materials without the additional pressing process, which creates a deep penetration effect into the material structures.

- **Structural Features**

The quarter-lock joint system, designed with an interlocking "step" profile, completely eliminates thermal bridging and ensures high energy efficiency.

Thin Brick Thermal Panel

Installation adhesive foam

Insulation (EPS/XPS polystyrene)

Thin brick veneer

Grout (decorative layer)

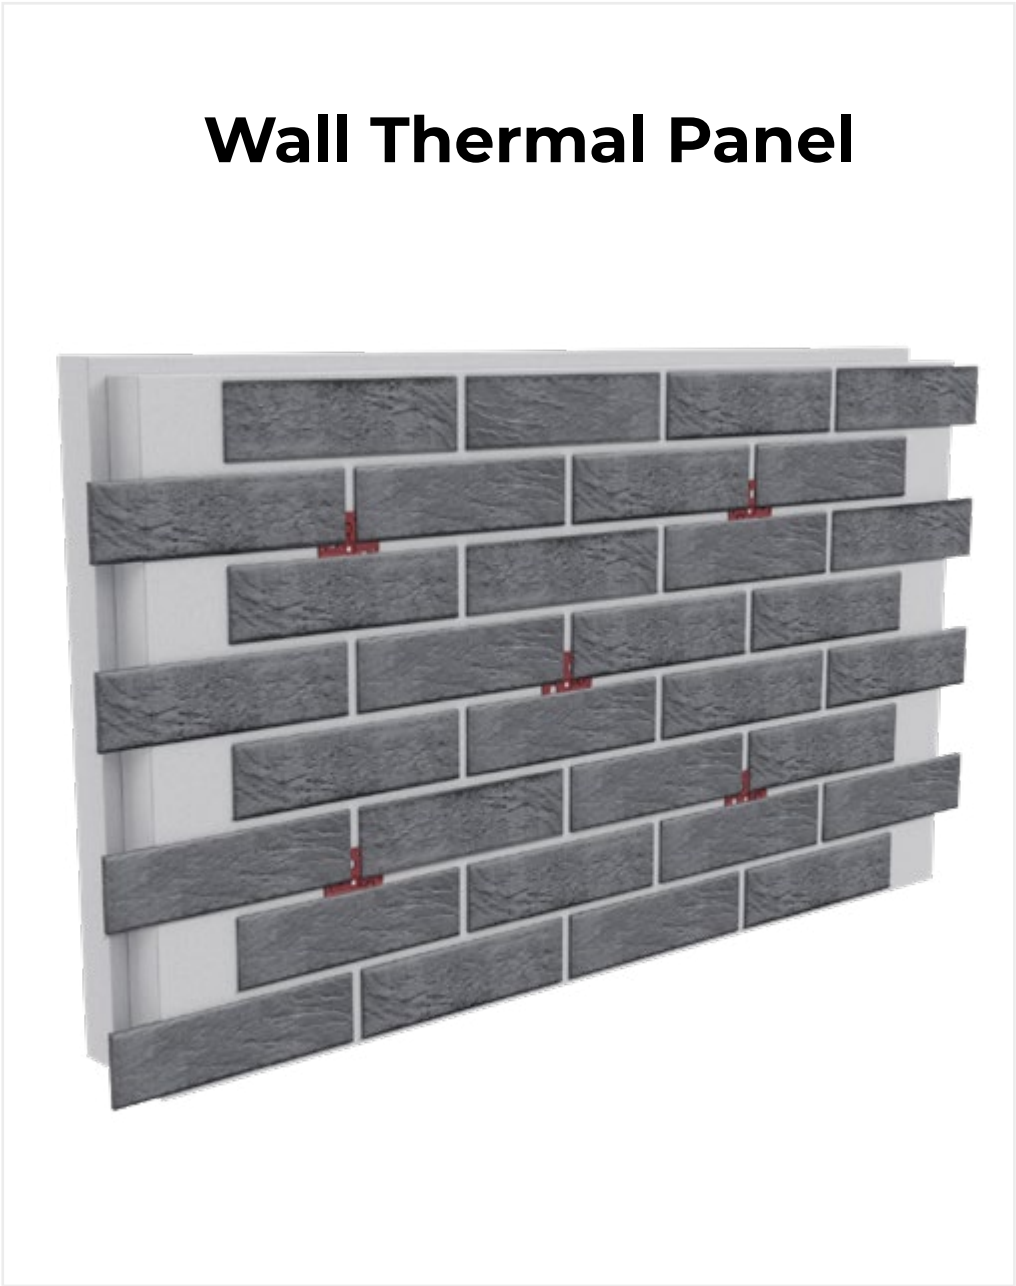

Plastic rondel (embedded fastening element)

Interlocking Joint System

Thin Brick Thermal Panels with a special quarter-lock joint, designed to prevent thermal bridging, are known as “F” format insulation panels. The minimum thickness for these panels is 1.97” for expanded polystyrene (EPS) and 1.18” for extruded polystyrene (XPS). The maximum thickness is 9.84”.

Advantages of “F” Format Thermal Panels:

- Attractive pricing.
- The thin brick veneer is pressed into the insulation almost entirely (except for sections that extend beyond the insulation). According to Test Protocol No. 211-323/124/18, the bond strength between the tile and insulation exceeds the standard by 4.7 times.
- A versatile format suitable for both insulation and decorative purposes.
- Quarter-lock joint around the entire panel perimeter.

Tile Manufacturers We Work With

King Klinker

A Polish manufacturer of premium thin brick veneer.

Established in 1972, King Klinker has become one of Europe’s most recognized producers of high-quality thin brick products. The company’s key to success lies in using traditional manufacturing methods to produce authentic clinker.

Golden Tile

A leading manufacturer of thin brick veneer: ceramic tile and porcelain stoneware.

Golden Tile is one of the largest producers in Eastern Europe, with an annual production capacity of around 24 million m². The brand holds a strong market position domestically and is one of the region’s top exporters.

Paradyz

A Polish manufacturer of high-quality ceramic tile (thin brick veneer).

Paradyz is recognized as one of the world’s leading producers and sellers of premium ceramic products. While all production facilities are located in Poland, its products are widely known and sold internationally.

Cerrad

A Polish manufacturer of decorative ceramic products.

Among many European brands, Cerrad stands out for its quality and innovation. Its ceramic tiles are sold in more than 50 countries, and the company consistently ranks among the fastest-growing ceramic manufacturers in Europe.

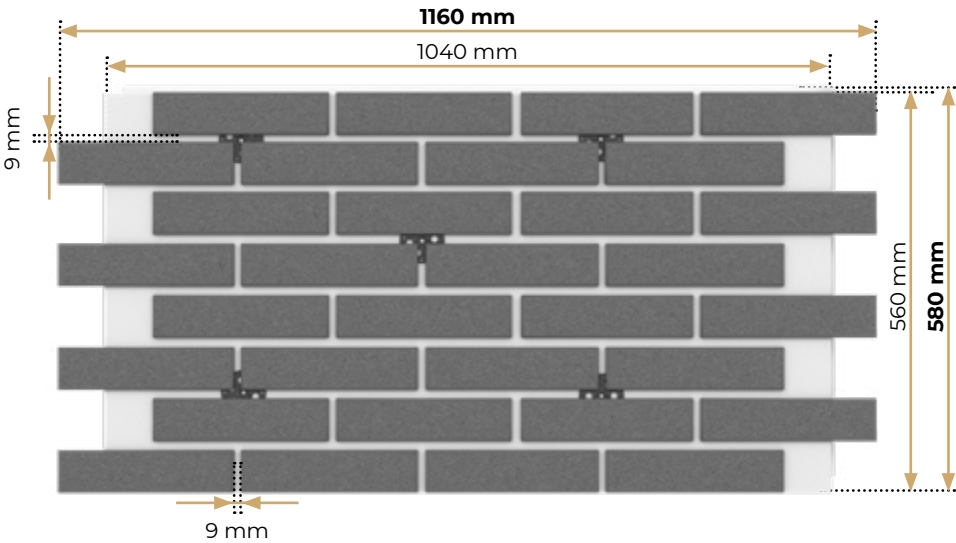

Feldhause Klinker

A German manufacturer of thin brick veneer and brick products with over 160 years of history.

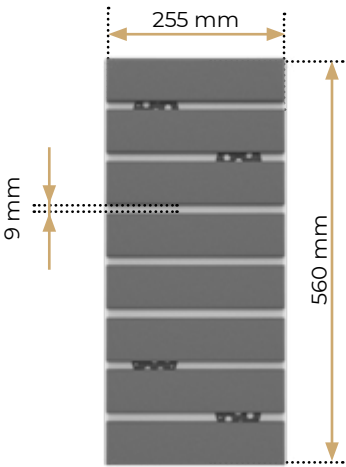

Known for exceptional quality, durability, and authentic designs, Feldhaus Klinker exports its products to dozens of countries worldwide.

Certificates and patents

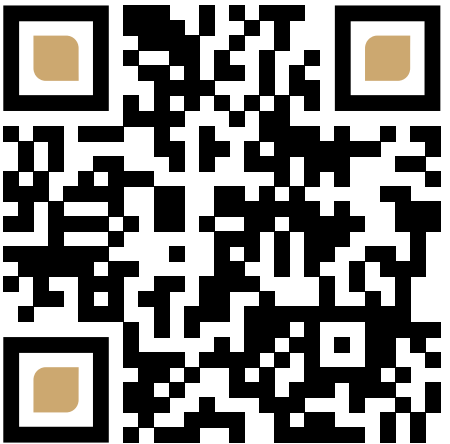

You can be confident in the quality of our products and the soundness of your choice. All our products are fully certified and meet all required quality standards.

Our products have received high ratings across all parameters, meeting strict regulatory requirements. You can rest assured: Thin Brick Thermal Panels from Royal Facade are a long-term investment in your property. Certified according to **EAD 040914-00-0404**.

Our certificates and patents include:

- EPS-90 Graphite Quality Certificate
- EPS-90 Graphite Fire Reaction Test
- EPS-90 Quality Certificate
- EPS-90 Fire Reaction Test
- XPS-35 Quality Certificate
- XPS-35 Fire Reaction Test

and others, which you can find on our website:
<https://royalfacade.us/certificates/> or upon request.

“Thin Brick Thermal Panels by Royal Facade™ combine modern European eco-technologies for energy efficiency with the timeless aesthetics of home insulation.”
